

Policy in the field of quality South Kazakhstan Medical Academy

South Kazakhstan Medical Academy (hereinafter - SKMA) is a leading medical higher educational institution of the Republic of Kazakhstan, for more than 40 years providing educational services in the Kazakhstan and international markets.

SKMA trains highly qualified specialists and scientific staff of medical, pharmaceutical and engineering-pharmaceutical direction at all levels of training: secondary technical professional education (medical college), higher education (bachelor's degree, internship), postgraduate education (residency, master's degree, doctorate); continuous professional development of health care system personnel (advanced training and retraining of medical and pharmaceutical personnel).

Educational, research and clinical activities of South Kazakhstan Medical Academy are aimed at fulfilling the mission, goals and objectives outlined in the development program of SKMA as a leading educational and research university of the Republic of Kazakhstan.

The main condition for the implementation of the Quality Policy is the focus on the constant fulfilment of requests and expectations of stakeholders at the level of world standards, and continuous improvement of their quality on the basis of effective modern training system and developed educational programs.

The educational activity of SKMA is aimed at fulfilling the principles of the Bologna Declaration, the principles of the quality management system outlined in the international standards of the ISO 9001-2015 series, the requirements of the legislation of the Republic of Kazakhstan, the Concept of Development of Higher Education and Science of the Republic of Kazakhstan for 2023-2029, the Concept of development of healthcare of the Republic of Kazakhstan until 2026, state education standards, compliance with the internal quality assurance system based on international standards and guidelines to ensure the quality of higher and postgraduate education in the European Higher Education Area (ESG), the implementation of partnerships with domestic and foreign educational, medical and research organizations.

Creation of favourable conditions for staff and students and provision of necessary resources to conduct quality modern educational activities are the main priority of the top management of SKMA with the aim to form human and intellectual potential of medical and pharmaceutical industry for sustainable functioning and development of health care system in the Republic of Kazakhstan.

Educational, research and clinical activities of the SKMA are the basis for an effective system of training of highly qualified specialists with knowledge and skills in the field of innovative technologies, is the foundation for the functioning of the health care system to provide quality medical services, ensure effective circulation of medicines and improve the health of the population.

Close integration of education, science and clinical practice has been identified by the management as one of the main criteria for further development of SKMA as a competitive medical university of the country. Establishment and development of scientific schools, commercialization of scientific research results is one of the most important directions of the management and teaching staff of the university.

Continuous improvement of mechanisms of corporate governance and management of all areas of activity contribute to the financial stability of the university, development of informatization of activities and processes, internal and foreign partnerships.

Youth policy of SKMA contributes to the social formation and development of young people, improvement of educational work and expansion of opportunities for social support of students.

The top management of SKMA highly appreciates the commitment, initiative and professionalism of the staff and hopes to maintain this Policy at all levels.

Rector
